Art Unit: 1732

**DETAILED ACTION**

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The originally-filed specification fails to state or teach one of ordinary skill in the art how an inner layer of a knitted cloth is not destroyed by an expansion effect (i.e., expanding a wet suit fabric piece between two sets of squeeze rollers) and does not state or teach one of ordinary skill in the art how an inner layer of a knitted cloth becomes an elastic terry weave under recovery action of a rubber. Without this disclosure, one of ordinary skill in the art could not practice the claimed invention. Applicant should note paragraph 13 of the originally-filed specification, which provides support for these claimed aspects, and which also

Art Unit: 1732

recites the use of an adhesive effect of a paste (although it is not clear how (or if) such effect is related to the non-destruction of an inner layer of a knitted cloth and/or how an inner layer of a knitted cloth becomes an elastic terry weave).

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 12, "an inner layer" does not have clear and proper antecedent basis in the claim because there is no prior recitation of a layer structure of the knitted cloth.

#### **Conclusion**

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited U.S. patents are of interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leo B. Tentoni whose telephone number is (571) 272-1209. The examiner can normally be reached on Monday - Friday (6:30 A.M. - 3:00 P.M.).
